FOREWORD

Timely and accurate agricultural data is a central support to design policies for development of agriculture sector as well as for eradication of poverty and improving food security. Ministry of National Food Security & Research has the mandate to achieve the foremost goal of national food security endeavoring through incessant research and improved national policies. The collection and compilation of statistical data on agriculture sector at national level is also the key function assigned to this Ministry. Maintaining the necessary statistics pertaining to food and agriculture sectors is the principal objective in the direction to achieve this national goal that greatly helps researchers, academia, and policy makers. Research is a continuous process, and the availability of reliable data is a pre-requisite to get logical research results and paving the way for concrete policy decisions.

This publication is a part of concerted efforts to provide concrete basis for research in the field of agriculture and it contains data regarding production, consumption, prices, imports, and exports of food grains. The best feature of 55th edition of this publication is its comprehensiveness that it provides all sorts of data relating to agricultural sector of the country up to June 2022 which includes area, production and yield of crops. The data for the earlier period commencing from 2001-02 through 2021-22 has also been provided for supporting time series analysis. It contains province-wise, crop-wise and other statistical data pertaining to agriculture sector.

I wish to commend the Economic Consultant and his team for preparing this imperative publication which will serve as a source of invaluable reference for all stakeholders pertaining to food and agriculture sector. The information contained in this book can be useful in designing growth models, plans and strategies for the development of agriculture sector to achieve the key objective of accelerating the pace of economic development.

Any suggestion for improving the scope of this publication will be appreciated.

(Zafar Hasan)

Secretary

Islamabad

April,2023

INTRODUCTION

Since 1968, the Economic Wing of defunct Ministry of Food and Agriculture was publishing Agricultural Statistics of Pakistan on annual basis. This publication is widely used by the local and international organization for policy formulation, planning and research. Major objectives of this publication are to facilitate policy formulation, planning and research. The Economic Wing Ministry of NFS&R is undertaking this significant activity of presenting this publication “Agricultural Statistics of Pakistan 2021-22”.

Agriculture is the backbone of Pakistan’s economy and is an inevitable and integral part to ensure Food Security in the country. About 65% of the population is engaged in farming directly or indirectly through production, processing and distribution of major agricultural commodities. Agriculture contributes about 20 percent of our Gross Domestic Product (GDP), provides livelihood to about 65 percent people living in rural areas and employs about 38 percent of the total national labour force. The agriculture sector is the major contributor in the overall export earnings of Pakistan. The share of food group alone in the total export of Pakistan for the year 2021-22 stood at 17.5 percent. Agriculture is equally important for industrial development.

This publication of Agricultural Statistics of Pakistan is aimed at providing area, production and also per hectare yield data about major and minor crops. The data is for the period from 2001-02 to 2021-22 to facilitate year-to-year comparison and analysis. Variety-wise data of major crops i.e. cotton and rice is provided, while data of other crops are without any varietal differentiation. The data relating to fruit such as citrus, mangoes etc. and major condiments/vegetables such as onions and potatoes etc. has also been added.

It also contains land use statistics including the details of irrigated, non-irrigated areas, farm size etc. The data about agricultural inputs i.e. improved seeds, fertilizers, water, pesticides, rainfall data and details of area covered by plant protection etc are also given. The data relating to disbursement of agricultural credit by Commercial Banks, ZTBL, PPCBL and domestic private banks is also documented in this publication. The data pertaining to agricultural machinery, lift pumps, tube wells and tractors according to horsepower, farm size as well as private/public ownership etc is also part of this publication. Being integral part of agricultural system the publication is consisting of data on livestock population in the country alongwith estimated production of milk, meat, eggs and other livestock products etc. It also provides data about inland and marine fish production and details of

fishing crafts. Part of the publication also provides information about forestry, rangeland, major forest products and value addition of various forestry products etc. The publication also covers trade statistics relating to major exports and imports of agricultural commodities. In addition, it provides details of procurement/support and intervention prices as well as wholesale prices of various important crops such as wheat, cotton, sugarcane and maize besides rates of diesel, electricity & petroleum products etc. The data provided on per capita availability of cereals, edible oils, meat, fish and milk alongwith estimates of GDP etc. add value to this publication.

It is important to mention that the crops data is collected through acreage surveys as well as sample village surveys by the enumerators who fill up a number of prescribed Performa's and submit to Provincial Crop Reporting Services. The accuracy of estimates is further cross checked and verified by joint inspection teams of Revenue and Extension Departments of Provincial Governments. These crops estimates are supplied to the PBS for compilation at Federal level. The estimates are submitted in three stages i.e. first, second and final estimates for the major crops. Reasons for increase/decrease in the production of major crops have been included to facilitate the data analyst. A summary table about area, production and yield of agricultural commodities has also been added in the publication for the years 2020-21 to 2021-22.

The Government policy is to ensure food security through sustainable agricultural development and balanced growth of food sector to meet growing population needs and also to generate agricultural surplus to enhance the export of agricultural sector, which would eventually lead to a healthy economy. It would only be possible, if reliable data is available; which is the primary objective of this publication. The timely and prompt cooperation extended by all the concerned departments and organizations at federal and provincial level is well acknowledged with gratitude.

The publication is also available at M/o NFS&R's website www.mnfsr.gov.pk. Economic Wing M/o NFS&R may be contacted for any additional information/suggestions for improvements, in future endeavors.

Food Crop = Wheat, Rice, Jowar, Maize, Bajra and Barley.

Cash Crops = Sugarcane, Cotton, Tobacco, Jute, Sugarbeet, Guarseed & Sunhemp

Pulses = Gram, Mung, Masoor, Mash, Mattar, Other Kharif & Other Rabi Pulses.

Edible Oilseeds = R&M Seed, Sesamum, Groundnut, Soybean, Sunflower, Safflower,

(Production includes Cotton Seed as well).

2021-22	3053.7	3009.8	1791.8	2648.0	2919.6

The reasons for increase in area and production are given below:

- Grow more wheat campaign by Agriculture Extension Department.
- Early cutting of cotton due to continuous rains affected the productivity phase of the crop
- Comparatively early start of sugarcane crushing season due to shortage of sugar in country.
- Favorable weather condition for wheat crop at the time of sowing.
- Attractive market price of wheat during last year.
- Distribution of wheat seed on subsidized rate from Agriculture Extension Department.
- Comparatively improved water availability position.

The reasons for increase in area and production are given below:

1. Good economic return encouraged the growers to bring more area under the crop.
2. Shifting of cotton crop area to rice crop particularly in Faisalabad and D.G. Khan Division.
3. Monsoon rains in Sindh started from the month of July and August. At that time the major portion of the crop was at productive phase, but due to heavy and continuous monsoon rains, in few areas under crop cultivation damaged. The increase in production is due to increase in area.
4. Development of high yielding and disease tolerant varieties.
5. Good advisory services and management by the government.
6. Better supply of irrigation water

The reasons for increase in area and production are given below:

• Increase in area is due to favorable weather condition during sowing time.

N.B: • The production increase was due to increase in area.

• Availability of water, improved variety of seed and seasonal rain on time.

• Better economic returns.

The reasons for increase in area and production are given below:

- Due to favorable weather conditions.
- N. B
- Better management.
 - Timely availability of quality inputs.
 - Higher economic returns.

2021-22	687.2	858.7	521.6	432.3	731.4

The reasons for decrease in area and production are given below:

- 1. Major decrease in area is in Punjab, which is due to discouragement of growers regarding less economic return as compared to other competitive crops and due to damage of crop last year because of pest/insect attack.
- 2. Production increase because of higher plant population due to higher germination as compared to last year.
- 3. Less attack of sucking pest as compared to last year (white fly, jassid, mealy bug, CLCV and especially pink boll worm)
- 4. Favorable weather (less rainfall especially in southern Punjab).
- 5. In KPK, the area increased due to better marked price and production increased due to increase in area.

Source:- Provincial Agriculture Departments.

GEOGRAPHICAL AREA is that area which has been surveyed and calculated by the Survey of Pakistan**TOTAL AREA REPORTED** is the total physical area of the village/deh, tehsil or district etc.**FOREST AREA** is the area of any land classed or administered as forest under any legal

enactment dealing with forests. Any cultivated area which may exist within such forest should be excluded (and shown under heading cultivated area).

AREA NOT AVAILABLE FOR CULTIVATION is that uncultivated area of the farm which is under farm home-steads, farm roads and other connected purposes and therefore not available for cultivation.**CULTURABLE WASTE** is that uncultivated farm area which is fit for cultivation but was not cropped during the year under reference nor in the year before that.**CULTIVATED AREA** is that area which was sown at least during the year under reference or during the previous year. Cultivated Area = Net Area sown + Current Fallow**CURRENT FALLOW** is that area which is vacant during the year under reference but was sown at least once during the previous year.**NET AREA SOWN** is that area which is sown at least once during (Kharif & Rabi) the year under reference.**AREA SOWN MORE THAN ONCE** is the difference between the total cropped area and the net area sown.**TOTAL CROPPED AREA** means the aggregate area of crops raised in a farm during the year under reference including the area under fruit trees.

N.B. Vegetables include Potatoes.

Food Crops = Wheat, Rice, Jowar, Maize, Bajra and Barley.

Cash crops = Sugarcane, Cotton, Tobacco, S.beet, Jute and Guarseed

Pulses = Gram, Mung, Mash, Masoor, Mattar, Other Kharif and Rabi Pulses.

Oilseeds = Rapeseed & Mustard, Sesamum, Groundnut, Linseed, Castorseed and other oilseeds.

Condiments = Chillies, Onion, Garlic, Coriander, Turmeric and Ginger

* Rabi data from KPK has not been received from IRSA. However, 5.4 MAF total water available at canal head has been assumed for KPK

** Water at farmgate has been calculated by taking into account the conveyance losses in canals and improvement in water conveyance efficiency due to lining of watercourses

Source: Planning & Development Division (Water Resources Section) and IRSA.

Note

I= Gross Production, II= Human Consumption, NA= Not available

15% of total milk production is excluded as milk sucked by young animals, 5% is excluded as wastage in transportation

Only 5% of adult female sheep and 15% of adult female goats and 50% of adult female camels are milked for human consumption
