MESSAGE

Horticulture sector has the prime importance in Pakistan Agriculture Industry. The horticulture sector is not only producing fruits and vegetables for local consumption but also earning a handsome amount of foreign exchange through export of fruits and vegetables produced in Pakistan. Pakistan is self-sufficient in production of staple foods, livestock and dairy, however, economic access and utilization persist as the major limiting factors for household-level food and nutrition security.

Present Government has accorded high priority to the development of agriculture to play a vital role in boosting national economy and ensuring food and nutritional security. The emphasis is also given to agriculture, livestock, research and development priorities with a focus on nutrient dense foods such as fruits, vegetables, legumes and animal source foods. Fruit, Vegetables and Condiments Statistics of Pakistan 2022-23 is valuable addition in the Ministry's Publications.

Dr. Kausar Abdullah Malik
Caretaker Federal Minister for
National Food Security and
Research (MNFS&R)

26th February 2024

MESSAGE

Agriculture is lifeline of Pakistan's economy. About 68% of population is engaged in farming directly or indirectly. Pakistan has a great potential for horticulture due to the variety in land and climate which provide rich opportunity for the production of a wide range of horticulture crops. This publication includes fruit, vegetables and floriculture commodities produced in the country and a viable, profitable horticulture sector can provide a sustainable livelihood to the rural agriculture commodity.

I appreciate the officers and staff of Economic Wing and also those who participated in collection and compilation of data and provincial Crop Reporting Service centers (CRS).

Suggestions are always welcome to make better this publication in future.

Capt. (R) Muhammad Asif

Secretary

Ministry of National Food Security and Research (MNFS&R)

26th February, 2024

FOREWORD

Horticulture in Pakistan has emerged as an important sector contributing to the national agricultural GDP's share and produce large number of horticultural products to fulfill domestic demand of fruit and vegetables for ever increasing population.. Pakistan is a major producer of fruits and vegetables and around 29 types of fruits and 33 types of vegetables are produced in the country throughout the year. However, most of the production is consumed in domestic markets. Production of citrus, mango, apple, melons, dates, guava, and apricot reflect strong domestic market demand for horticulture crops. Citrus fruit, primarily the mandarin variety. The highest production has reached i.e Citrus fruit & Mango 2.4 and 1.6 million tons, the largest fruit crop group by volume and are major export revenue earner. According to latest figures Pakistan exported **628.8 thousand ton** of fruit increased **1.1 percent** from last year and **vegetables 1336.7 thousand ton** increased **42.2 percent** from last year in FY 2021-22.

Suggestions for improvement of the publication involved in data collection and compilation of "**Fruit, Vegetables and Condiments Statistics of Pakistan, 2022-23**" will be welcomed.

(Dr. Haroon Sarwar Awan)

Economic Consultant
